

## Dainty Lingerie Dresses to Share Honors With Sports Clothes

The fluffy afternoon frock is to divide honors with sports clothes this season. While we know that sports clothes are all-important, that their charms are indeed legion, and that no woman who considers herself as having the least pretensions to being fashionable will be without a goodly assortment of them this year; yet, in spite of this, we must acknowledge that there is a touch of severity about them that creates a craving for the contrast of dainty, frilly, lingerie frocks.

A Charming Way of Developing the New Bordered Fabrics

There comes a time in the life of even the most ardent devotee of sports when one must relax and it is at these times that the feminine longing for dainty, picturesque frocks, meant solely to make one as bewitching as possible, must be satisfied.

And so, for the delight of the feminine heart, there are the most irresistible creations of sheer silk voiles, soft chiffons and crepes, to say nothing of the abundant variety of cotton voiles, marquisettes and swisses that are offered this year.

Silk marquisette is combined with charmeuse in many dainty dresses of the more elaborate kind. The firmer material, takes, seemingly, the less important part, but it really is quite important, forming the background, as it were, to bring out the sheer material to greatest advantage. It may be used in a band at the edge of the skirt and in touches on collar and cuffs, or it may be used for a skirt with a long overdress of the sheer material falling over it. Georgette crepe is another of the dainty materials employed in this manner.

The crepe de Chine dress is to come in for more attention than it has had for a long time. Crepe de Chine is to be one of the most popular fabrics for spring and summer dresses. No one will regret investing in a dress of this material, seeing that it has so many advantages, among them that of being a material which can be laundered very successfully. When so many of the present materials must be dry-cleaned, a dress which can be laundered and looks just as fresh as new is a great boon to those whose incomes do not permit of many extravagances.

### Smart Bordered Fabrics

Among the fashionable designs used in dress materials, borders appear very frequently. The bordered fabric with a design scattered all over the surface is one of the most striking of the new effects. Borders on plain materials have been used largely before, and they are again favored this season, but the border around an allover design is the very newest fashion. Both the embroidered and the printed

Youthful Evening Frock with Puffed Skirt

effects are looked upon with favor. The colors show the same tendencies noted in the other spring and summer materials; that is, they are quite gay

and often combine several bright tones. One of these fascinating bordered fabrics is illustrated in the sketch of an afternoon dress for a young girl. This shows by far the simplest and not the least effective way of using such materials. The border goes around the bottom of the skirt, and makes the belt, and a strip of it is applied around the edges of the sleeves, forming a veritable frame for the figure.

### Kimono Styles and Short Sleeves

The designers have returned to kimono sleeves and the body-and-sleeve-in-one effects. Many of the new blouses and dresses are made in these styles; and a good many show the short sleeves, which have a fair promise of being taken up for spring and summer, though not to the exclusion of long sleeves. The most favored type of long sleeve at present is fitted closely from the elbow to the wrist. At the elbow, or above it, there is fullness, the sleeve being shaped in a point extending away from the elbow.

### The Puff in Skirts

A feature of the new skirts which appears to be very acceptable is the puff at the lower edge produced by a gathering of the edge to a foundation. Evening dresses are especially graceful in this style, whether made of taffeta, satin, charmeuse or the other soft silks. This is a very delightful effect for young girls and is used very frequently for their party frocks. The illustration shows how full of charm are misses' dresses in this style, and that a great deal of this charm lies in its simplicity. The model is developed in soft rose charmeuse, with chiffon of the same shade embroidered with gold threads forming the simple little bodice. Orchid and sea-foam green are among the other evening colors which make exquisitely pretty frocks for the younger set.

Fans, slippers and stockings to match the dress are some of the details which one should be mindful of in planning party frocks to be in perfect harmony.

## PLAN HIGH SCHOOL FOR WADSWORTH TOWNSHIP

At last, a step in the development of the Wadsworth township schools, which has been steadily growing, seems to be approaching a focus. At a recent meeting of the Board of Education of this township, Mr. Jenks, the county superintendent, suggested that the time to begin definite plans of organization is at hand, and that the township can no longer afford to educate their children above the eighth grade at the village school.

There are many good reasons for a high school should be organized and maintained by the township in connection with their most excellent and centralized grade schools. All who are interested in the education of the children of Wadsworth township and have given careful thought to this proposition, agree that more children after passing the eighth grade, would take advantage of higher school facilities, if they could continue in a school, which they feel is theirs, and which would give them the type of an education best suited to their future needs. To those who do not attend school beyond the eighth grade, a rural school equipped to teach subjects of vital interest to country boys and girls, and in a way that they will feel that many of life's problems are being solved for them, would be a special appeal.

It is an indisputable fact, that the greater the chasm between the eighth grade and the high school, whether this chasm is one of difference in location, difference in the nature of instruction, policy, and spirit of the school, or a feeling due to the mere matter of precedent, fewer pupils will continue school work after finishing the eighth grade than if given the opportunity to pass directly without any material change in school conditions, from the lower grades to a study of the high school subjects.

At present, not more than two-thirds of the pupils eligible to the high school are receiving high school instruction, and that, under conditions not particularly congenial to rural children. This is true, not because of any degree of inferiority in curriculum, instruction, supervision, or equipment of our village schools, but simply because village and city schools are designed to meet the needs of children whose aptitudes and aspirations aren't rural. We have good reasons to believe that a far larger proportion of children would get a suitable and practical high school education than now do, if a high school, making a specialty of farm and home subjects, were conducted in connection with the school in which these children are securing their elementary training.

This kind of a school is not beyond the logical hope and financial conditions of the township. Last year's tuition bill of something more than \$725, was only an indication of what this bill would be if all who are entitled to a high school education in the township were securing it. A high school of the second grade for the first few years, and later developing into the first grade class, would offer instruction better adapted to the needs

### Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surface.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

Take Hall's Family Pills for constipation.

of the pupil, and at very nearly the same cost per pupil, as a far greater number would, without doubt, avail themselves of the opportunity. Other townships in the county, with a tax duplicate no larger than that of Wadsworth township, have built buildings, costing from fifteen to twenty thousand dollars, and, in addition to this, are maintaining first grade high schools, second to none in other rural districts, and Wadsworth can do the same, with the added advantage of a fine school plant already constructed and paid for.

### MAXWELLS HOLD MANY RECORDS

That the Maxwell Car holds more records than any other regular stock car in the world, is the statement made by members of the Maxwell Motor Co. "Maxwell cars", according to the local dealers, "were never intended for race courses, but are built for conservative people who want a car that will run day in and day out and will do this at a low operating cost." "The Maxwell is generally recognized as the world's endurance champion as a car of this make has run for 44 days and nights without a motor stop, covering 22,022 miles of all sorts of city streets and country roads—all this without any repairs or readjustments.

### TALKS ON BANKING

(American Bankers Association)

#### THE CHAMPION SAVER

To be singled out of a thousand people presenting a plan of life that best evidences the habit of thrift as applied to good living, and awarded the first prize of \$50, is a worthy honor, to be coveted by any man. This happy experience has recently befallen the Rev. W. C. Poole of Ocean City, Md., to whom the award was made by a committee of prominent bankers and business men, in a thrift contest conducted by the New York Evening World.

Mr. Poole's salary for the past 16 years has averaged but \$738.18 aside from house rent and donations. This is about \$15 a week. He has saved \$2,000, visited two expositions, traveled throughout New England by trolley, bought books and magazines, and given to church and charity.

Mr. Poole never buys on credit. He says he has saved \$50 a year by buying for cash and \$150 on things he didn't buy, because he couldn't pay cash. He has kept strict account of all expenditures and each year has tried to do better with the same money.

He started thriftward by saving a dollar a week and has steadily kept it up. He appropriates 10 per cent. for church and charity and 10 per cent. for the savings bank. In his letter he says:

"I have never spent a dollar for tobacco, drink, theaters, movies or so-called fashionable dress, but have met the requirements of a minister in all grades of financial and social church life. When I cannot get what makes me glad I am glad of what I get—or try to be. I have more to be glad of and less to be sad of than any one I know. I have not found any one with a better financial system although I have sought for such. The above system was largely inspired by reading

the autobiography when I was a boy, of Benjamin Franklin. The reading of this book should be required of all Americans before they are allowed to vote."

It would seem impossible on so small a salary to live decently and save money, yet Mr. Poole has done it. He has kept at his plan and has succeeded, as can every one who makes up his mind to save money and adopts a definite method. His two rules, "Never buy on credit and save something every week," are sensible and sure to accomplish wonders if consistently followed. They are worth trying out.

### We BRAG a Little Sometimes

about our Old Tavern and Spring Hill coffees. We believe there is none in the world better for the money than these brands. Our oyster crackers are the best; we're selling lots of them at 12c a pound. Fine large peanuts in the shell 12c a pound; salted 15c. We sell Black Diamond Lice powder, with an absolute guarantee; it must do the business or we give your money back. We have a good sale on it and sell to some that won't waste money on other kinds. Don't let your stock and poultry remain lousy, but try a can of Black Diamond, at our risk.
